CONTENTS

Preface IX

SECTION I. VAPOUR GROWTH OF SINGLE CRYSTALS 1

I. Sunagawa, Vapour growth and epitaxy of minerals and synthetic crystals 3
R.R. Hasiguti, T. Ishibashi and H. Yumoto, Morphology and growth mechanism of vapor grown Cd crystals as affected by Bi impurity 13
M. Harsdorff and G. Reiners, The mobility of small gold crystallites on KBr cleavage planes 17
Y. Bando, M. Kyoto, T. Takada and S. Muranaka, Mass spectrometric study on chemical transport of VO_2 20
M. Saeki, M. Ishii, I. Kawada and M. Nakahira, Effect of addition of vanadium on the chemical transport of TeS_x, x = 1.40–1.70 25
T. Kobayashi and H. Takei, Chemical vapor deposition of scandium hydride 29
R. Madar, F. Weiss, R. Fruchart and C. Bernard, Thermodynamic and experimental studies of the CVD of A-15 superconductors. I. Nb_3Ga 37
T. Kobayashi and Y. Furukawa, Epitaxial relationships during the formation of three-dimensional snow dendrites 48
Y. Furukawa and T. Kobayashi, On the growth mechanism of polycrystalline snow crystals with a specific grain boundary 57
T. Gonda and T. Yamazaki, Morphology of ice droxtals grown from supercooled water droplets 66

SECTION II. THIN FILM EPITAXY 71

II.A. *Vapour phase epitaxy*

II.A.1. *Group IV elements and compounds*

A.A. Chernov and M.P. Rusaikin, Theoretical analysis of equilibrium adsorption layers in CVD systems (Si–H–Cl, Ga–As–H–Cl) 73
J. Nishizawa and H. Nihira, Mechanisms of chemical vapor deposition of silicon 82
W.J.P. van Enckevort and L.J. Giling, The influence of adsorption and step reconstruction on the growth and etching vectors of silicon (111) 90
V.S. Ban, Novel reactor for high volume low-cost silicon epitaxy 97
T. Suzuki, Y. Inoue, M. Ura, T. Ogawa and Y. Sugita, In-process monitoring and control of doping gas concentration during vapor phase silicon epitaxial growth by using a flame photometric detector 108
P.D. Braun and W. Kosak, Local selective homoepitaxy of silicon at reduced temperatures using a silicon–iodine transport system 118
M. Taniguchi, M. Hirose and Y. Osaka, Substitutional doping of chemically vapor-deposited amorphous silicon 126
G. Majni and G. Ottaviani, Solid phase epitaxial growth of Si through Al film 132
H. Matsunami, S. Nishino and T. Tanaka, Heteroepitaxial growth of β-SiC on silicon substrate using $SiCl_4$–C_3H_8–H_2 system 138
S. Nishino, H. Matsunami and T. Tanaka, Growth and morphology of 6H-SiC epitaxial layers by CVD 144

II.A.2. *III–V compounds*

I. Garrett, M.M. Faktor and M.H. Lyons, Studies of vapour transport reactions for III–V compounds 150
H. Seki, A. Koukitu, H. Seki and M. Fujimoto, Thermodynamic analysis for silicon contamination of VPE GaAs 159
K. Morizane and Y. Mori, A thermodynamic factor influencing the growth rate and purity of epitaxial layers in the Ga–$AsCl_3$–H_2 system 164
J. Komeno, A. Miura and S. Ohkawa, A multi-wafer growth technique for GaAs vapor phase epitaxy using the $AsCl_3$–Ga–N_2 system with a horizontal reactor 171
N. Kitamura, M. Kakehi and T. Wada, Vapor growth of $Ga_xAl_{1-x}Sb$ 176
J.P. Duchemin, M. Bonnet, F. Koelsch and D. Huyghe, A new method for the growth of GaAs epilayer at low H_2 pressure 181

K. Shohno, H. Ohtake and J. Bloem, Crystal growth of boron monophosphide using a B_2H_6–PH_3–H_2 system 187

II.A.3. *II–VI and IV–VI compounds*

N. Matsuda and I. Akasaki, Vapour-phase epitaxial growth of ZnS on GaP 192
M. Kitagawa, J. Saraie and T. Tanaka, Heteroepitaxial growth of ZnS on GaP by the close-spaced technique 198
T. Taguchi, S. Fujita and Y. Inuishi, Growth of high-purity ZnTe single crystals by the sublimation travelling heater method 204
A. Lopez-Otero and W. Huber, CdTe thin films grown by hot wall epitaxy 214
K. Mochizuki and K. Igaki, Vapor phase transport and stoichiometry control of cadmium sulfo-selenide 218
T. Jakobus and J. Hornung, Influence of the VPE parameters on the epitaxial film properties for the $(Pb_{1-x}Sn_x)_{1+y}Te_{1-y}$ system 224
H. Iwanaga, N. Shibata, O. Nittono and M. Kasuga, Crystal growth in *c* direction and crystallographic polarity in ZnO crystals 228

II.B. *Liquid phase epitaxy*

J.M. Robertson, Liquid phase epitaxy of garnets 233
T. Fukui and T. Kobayashi, New gaseous impurity and its effect on the purity of LPE GaAs 243
K. Ito and H. Ito, Growth of p-type InP single crystals by the temperature gradient method 248
K. Funakoshi, A. Doi, K. Aiki and R. Ito, Liquid phase epitaxial growth of $Ga_{1-x}Al_xAs$ on channeled substrates 252
Y. Takeda and A. Sasaki, Composition latching phenomenon and lattice mismatch effects in LPE-grown $In_{1-x}Ga_xAs$ on InP substrate 257
T.G.J. van Oirschot, W.J. Leswin, P.J.A. Thijs and W. Nijman, LPE growth of DH laser structures with the double source method 262
H. Takakura, M. Yamamoto, Y. Hamakawa and T. Kariya, Liquid phase epitaxy of $Al_xGa_{1-x}P$ on GaP and its application to double heterostructure light modulators 267
Y. Nanishi, K. Takahei and K. Kuroiwa, GaAs LPE growth and its applications to FET 272
M. Konagai, M. Sugimoto and K. Takahashi, High efficiency GaAs thin film solar cells by peeled film technology 277
S. Fujita, H. Mimoto and T. Noguchi, Liquid-phase epitaxy of ZnSe from Zn–Ga solution 281

II.C. *Molecular beam epitaxy*

Y. Shiraki, Y. Katayama, K.L.I. Kobayashi and K.F. Komatsubara, Molecular beam and solid-phase epitaxies of silicon under ultra-high vacuum 287
R.F.C. Farrow, A.G. Cullis, A.J. Grant and J.E. Pattison, Structural and electrical properties of epitaxial metal films grown on argon ion bombarded and annealed (001)InP 292
T. Murotani, T. Shimanoe and S. Mitsui, Growth temperature dependence in molecular beam epitaxy of gallium arsenide . 302
T. Yao, Y. Makita and S. Maekawa, Molecular beam epitaxy of $ZnSe_xTe_{1-x}$ $(0 \leqslant x \leqslant 1)$ 309
G. Shimaoka, Epitaxial growth of some II–VI compound films evaporated onto electron-bombarded NaCl substrates 313
T. Takagi, I. Yamada, K. Matsubara and H. Takaoka, Ionized-cluster beam epitaxy 318
I. Yamada, K. Matsubara, M. Kodama, M. Ozawa and T. Takagi, Characteristics of thin films formed by the ionized-cluster beam technique 326
A.E.T. Kuiper, G.E. Thomas and W.J. Schouten, Thin film deposition from beams of ionized atoms and clusters 332
K. Morimoto, H. Watanabe and S. Itoh, Ionized-cluster beam epitaxial growth of GaP films on GaP and Si substrates 334

II.D. *Sputtered films*

K. Ito, Preparation of Ge–Si epitaxial alloys by sputtering 340
T. Shiosaki, S. Ohnishi, Y. Murakami and A. Kawabata, High rate epitaxial growth of ZnO films on sapphire by planar magnetron rf sputtering system 346
H. Mitsuhashi, Y. Igasaki and M. Kaneko, Properties of titanium solid solutions prepared by reactive sputtering 350
K. Nunomura, A. Ishitani, T. Matsubara and I. Hayashi, Second harmonic generation in a sputtered $LiNbO_3$ film on MgO . 355
M. Naoe, Y. Hoshi and S. Yamanaka, High rate deposition of magnetic films by sputtering from two facing targets 361

II.E. *Miscellaneous films*

G. Ottaviani and M. Costato, Compound formation in metal–semiconductor interactions 365
K. Yoshida, K. Dejima, M. Nishijima and T. Yamada, Formation of amorphous Mn–Bi films and their crystallization process 376

Y. Arita, Formation and oxidation of porous silicon by anodic reaction 383
M. Ishida, S. Tsuji, K. Kimura, H. Matsunami and T. Tanaka, Epitaxial growth of ferroelectric PLZT [(Pb, La)(Zr, Ti)O_3] thin films 393
V. Labunov, V. Parkhutik and E. Tkharev, Model of plasma anodization of metals and semiconductors 399

SECTION III. CHARACTERIZATION

G.R. Booker, J.M. Titchmarsh, J. Fletcher, D.B. Darby, M. Hockly and M. Al-Jassim, Nature, origin and effect of dislocations in epitaxial semiconductor layers 407
T. Hayashi and S. Kurosawa, Electron microscope study of intrinsic and extrinsic stacking faults, and twins in SOS at the early stage of epitaxial growth 426
R.L. Park, P.I. Cohen, T.L. Einstein and W.T. Elam, Extended fine structure analysis using electron beams 435
J. Trilhe, J. Borel and J.P. Duchemin, Characterization of the silicon–sapphire interface 439
H. Itoh, T. Saitoh, N. Nakamura, S. Matsubara, T. Warabisako and T. Tokuyama, Characterization of silicon layers epitaxially grown on metallurgical-grade polycrystalline substrates 446
Y. Yamazoe, H. Takakura, T. Nishino, Y. Hamakawa and T. Kariya, Characterization of the optical properties of LPE $In_xGa_{1-x}As_yP_{1-y}$ thin layers grown on InP 454
T. Okumura and T. Ikoma, Deep levels and growth conditions of LPE GaAs crystals 459
M. Iwami, S. Kim, I. Matsuo and A. Hiraki, AES study of the low temperature growth of $Cu_{2-x}S$ on CdS 467
I. Spânulescu, N. Bălţăteanu and V. Ruxandra, The effect of electron irradiation on electrophysical properties of CdS, CdSe and ZnTe thin films 471
O. Nittono and S. Shimizu, An X-ray double-crystal method utilizing non-parallel setting for measuring local lattice mismatches between epitaxial films and substrates 476

SECTION IV. PARTICLES AND WHISKERS 483

R. Uyeda, Growth of polyhedral metal crystallites in inactive gas 485
S. Yatsuya, Y. Tsukasaki, K. Mihama and R. Uyeda, Preparation of extremely fine particles by vacuum evaporation onto a running oil substrate 490
H. Akoh, Y. Tsukasaki, S. Yatsuya and A. Tasaki, Magnetic properties of ferromagnetic ultrafine particles prepared by vacuum evaporation on running oil substrate 495
Y. Saito, S. Yatsuya, K. Mihama and R. Uyeda, Crystal structure and habit of fine metal particles formed by gas-evaporation technique; bcc metals (V, Fe, Cr, Mo and W) 501
K. Naito, N. Kamegashira and N. Fujiwara, Synthesis of nonstoichiometric zirconium carbide whiskers by chemical vapor deposition 506
I. Yamai and H. Saito, Vapor phase growth of alumina whiskers by hydrolysis of aluminium fluoride 511
K. Kishi, Morphological change from copper/α-copper–zinc whiskers to dendrites in zinc reduction growth 517
